Agenda

1. Why are Germans going crazy?
2. What do we need to be successful today?
3. What do we need for a successful future?

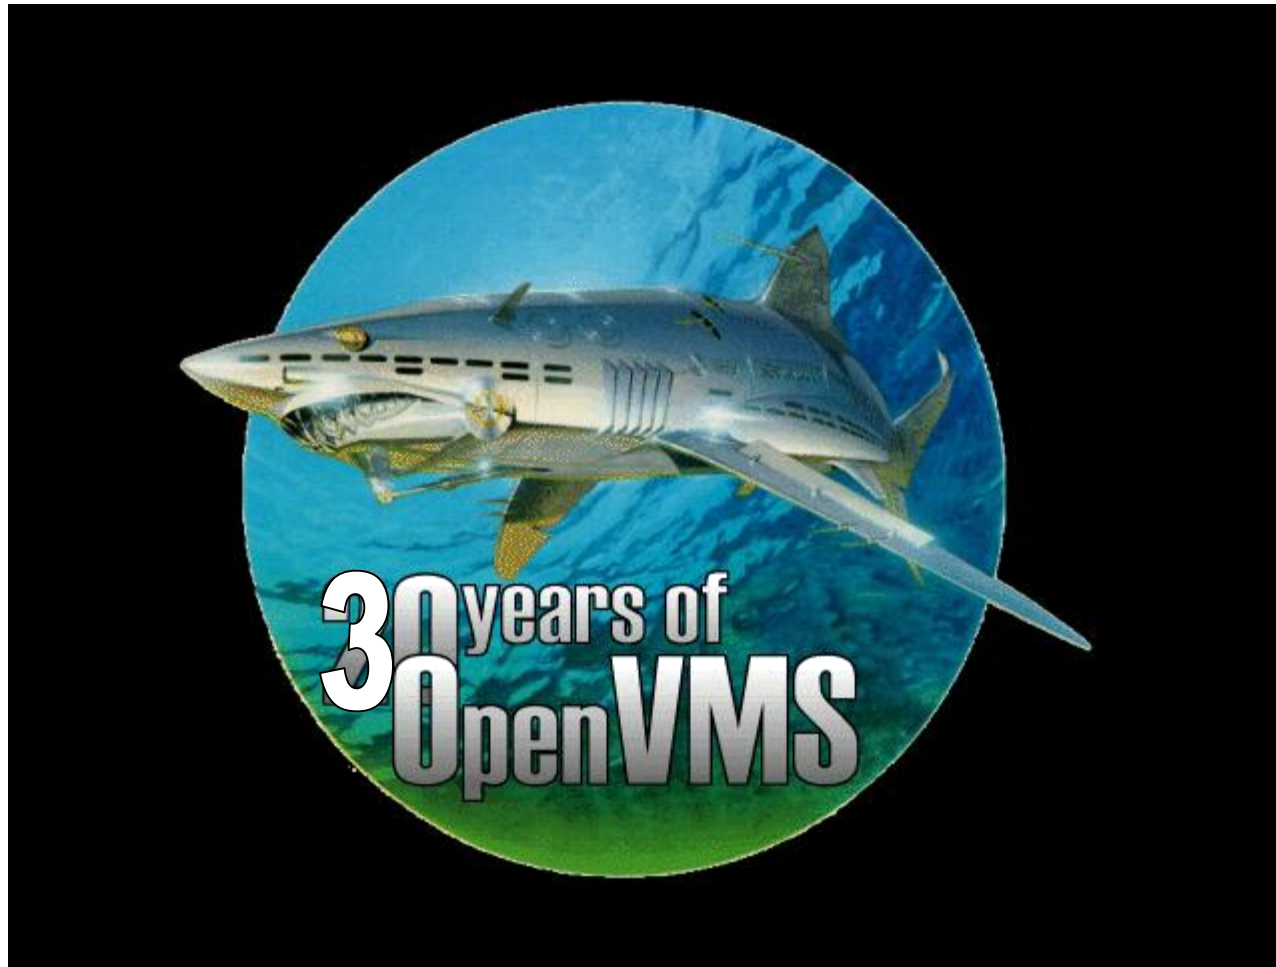

Germans going crazy

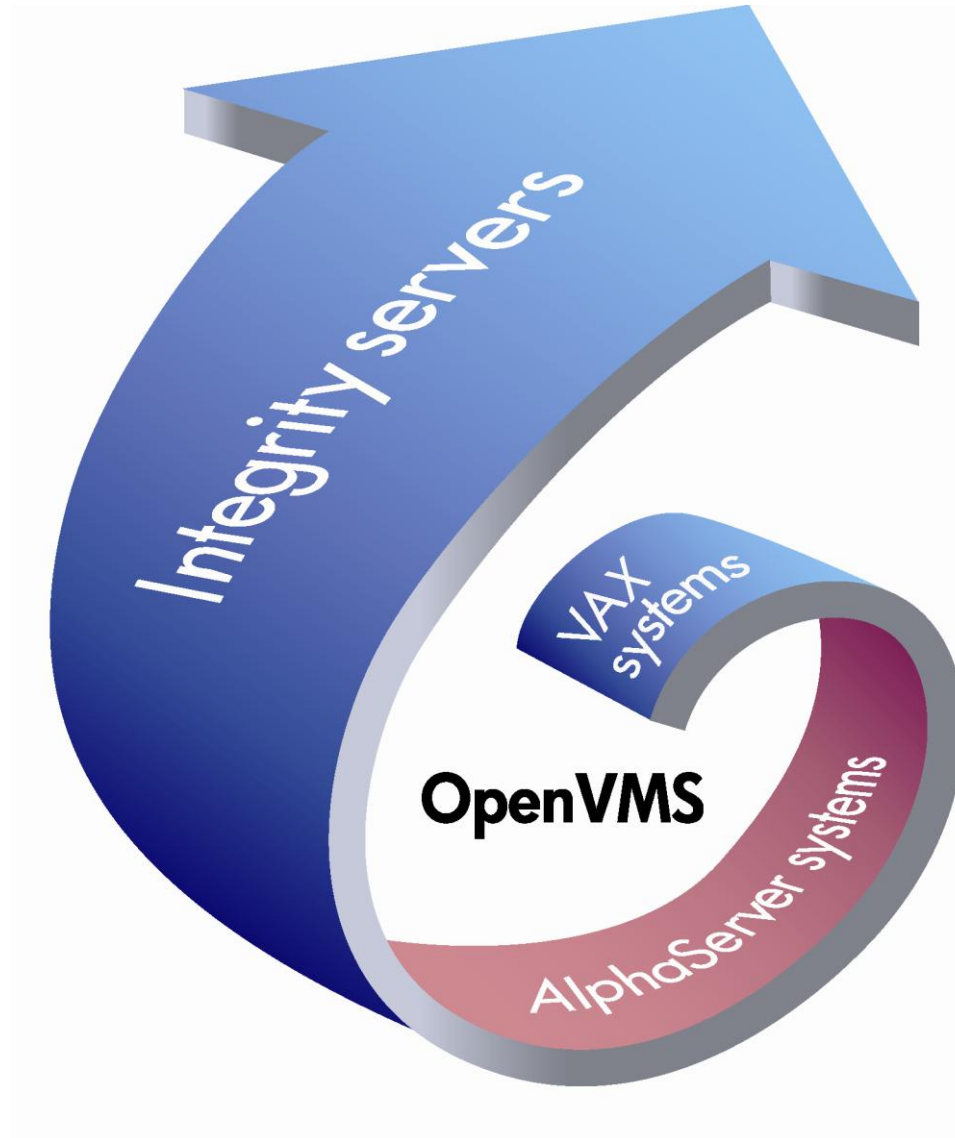

Wiesn

Germans going green

Germany OpenVMSfest

What do we need to be successful today

- Better business outcomes for your business

Accelerate business growth

Lower costs

Mitigate risks

In the new era of Business Technology.

For certain companies and government agencies
technology is more than important.

It is business critical.

When a mother dials 911.

When a bank moves money.

When a customer submits an order.

When a patient needs a doctor.

When a stock exchange executes a trade.

In these critical moments technology must produce the right outcome.

The strategic question is....

How do you create the infrastructure that will produce the right outcome?

Every time.

Welcome to

HP Integrity

HP Integrity is:

Trusted by more 911 systems,

Trusted by more hospitals with their infrastructure,

Trusted by more financial institutions with their assets,

Trusted by more global stock exchanges with their transactions.

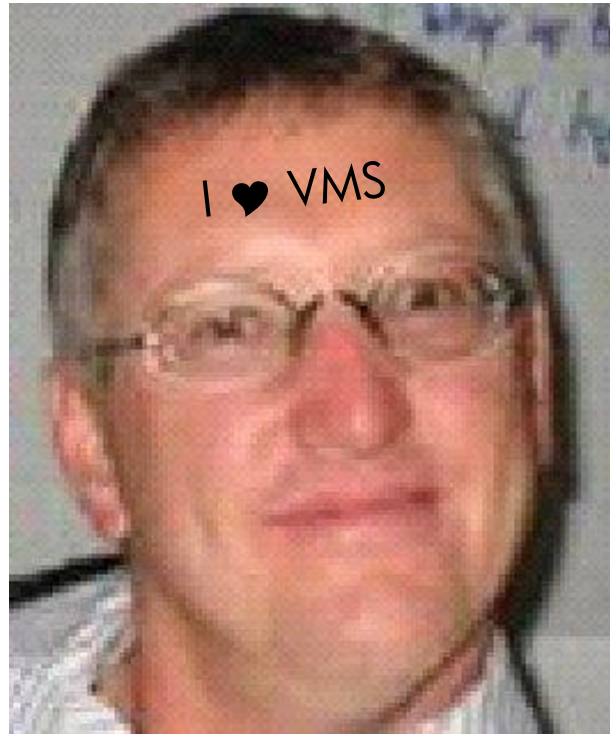

As a result, HP is the number one choice when the outcome is business critical.

What do we need to be successful today

- Better business outcomes for your business
 - Accelerate business growth
 - Lower costs
 - Mitigate risks
- Modern

Modern VMS man discovered!
